Sizewell C  
Project Update

Dec  
2017

## **Community leaders hear feedback on Sizewell C proposals**

**More than 100 community representatives and members of the public attended the Sizewell C Community Forum at the Riverside Centre, Stratford St Andrew.**

The Forum examined issues raised during Stage 2 Consultation. The group also discussed the next steps leading up to Stage 3 Consultation.

Jim Crawford, Sizewell C Project Development Director, described the feedback from Stage 2 as "High in volume and quality from a wide range of residents, community groups and their representatives".

Jim spoke about the need for Sizewell C, the commitment to take the time to get the plans and mitigation right, and the importance of proving the business case for the project.

Carly Vince, EDF Energy Chief Planning Officer, took the group through key areas of feedback: the main development site; accommodation campus; transport strategy; and benefits to the local community.

### **Stage 2 Summary**

- Over 70 public exhibitions, meetings and presentations
- 1,059 responses received (1,298 at Stage 1)

- All statutory and non-statutory responses have been analysed and grouped by theme – a qualitative process focusing on the issues raised
- All substantive responses have informed initial views on the way forward on options, further technical and environmental assessments and engineering studies.
